

Case Study:

Springpack offered products that were suited to our requirements, whilst offering great competitive prices also.

springpack 

The Challenge

In the last few months we have started to look at eco-friendly alternatives to the packaging items we have always used.

Springpack are working alongside us currently to advise and support with the switch and we have already made the move to eco-friendly packaging on some lines. Dan is always on hand to provide support and advice as and when we need it.

The Solution

The

Result

Springpack
have encouraged and
supported the transition to
becoming a more sustainable business, and
this is great as we are working on becoming
more eco-friendly as a company and the
packaging we use has a big impact on this.

For example, our bespoke post & rail
cardboard wrap is made from 80% recycled
material, and the Shrinkfilm is made from
30% recycled content!

Springpack have supplied us with packaging for many years now – 16 years to be precise!

We receive a very prompt and thorough service.

Dan is always on hand to provide support and advice as and when we need it.
