

Product:

Self-Adhesive Reinforced Cross Weave Kraft Paper

Typical Applications:

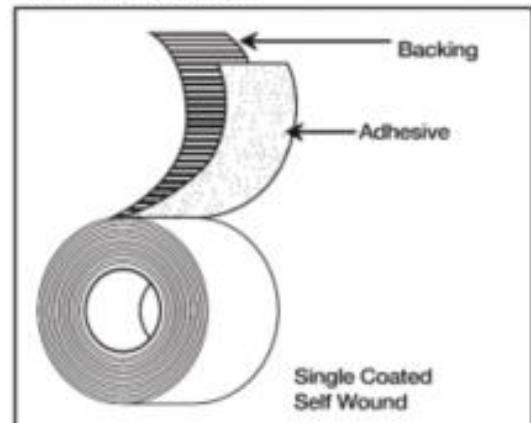

- Heavy duty carton sealing
- Security - tamper evident
- Alternative to water activated Kraft

Advantages & Benefits:

- Highly aggressive adhesive
- High tensile strength
- Excellent tamper proof seal properties
- Excellent adhesion

Construction:

- Kraft paper backing with cross weave glass fibre reinforcements
- Synthetic rubber (Hot Melt) adhesive
- Available unprinted
- Widths available – 50mm
- Lengths available – 25m
- Paper colours

CONSTRUCTION

*Lead times may vary depending on number of colours printed. Minimum order quantities apply

Brown

Technical Data

Measure	Unit	Result & Tolerance
Backing Weight (With Glass Fibre)	GSM	125 +/- 5%
Coat Weight	GSM	100 +/- 5%
Total thickness	Microns	265 +/- 5%
Peel adhesion (Afera 5001)	Newtons/25mm	>15 +/- 5%
Elongation (Afera 5004)	%	<3
Tensile Strength (Afera 5004)	Newtons/cm	125 +/- 5%

Additional information

Tape performance is guaranteed for the first 6 months. Product must be stored at ambient temperature (Between 18c-23c), in its original box and in a dry atmosphere away from direct sunlight. For product traceability, please advise the batch identification number printed on the box. For optimum performance stock should be rotated and used within 12 months. The tapes have adhesive that are pressure sensitive so must be properly applied to ensure the best performance.

Physical and performance characteristics shown above are obtained following tests recommended by AFERA and PSTC. The values given are typical values and do not constitute a specification. The user should determine whether the tape is suitable for the intended application.
